PROFESSIONAL SUMMARY

Final-year BSc (Hons) Data Science undergraduate (CGPA 3.56/4.00) seeking a data science or machine learning internship. Currently running the predictive modelling and decision dashboard for a satellite-based flood risk assessment study on the Kelani River Basin, forecasting flood events seven days ahead and validating against 15 years of recorded events; paper targeted at ICTer 2026. Comfortable across the full workflow: data cleaning, exploratory data analysis, feature engineering, model training, validation and deployment into something a decision maker can use.

TECHNICAL SKILLS

Programming: Python, SQL, R, JavaScript, TypeScript, Java

Machine Learning: scikit-learn, TensorFlow, regression, classification, time-series forecasting, feature engineering, model validation, prompt engineering

Data & Analysis: pandas, NumPy, exploratory data analysis (EDA), data cleaning, data wrangling, Matplotlib, Power BI, Microsoft Excel

Databases: PostgreSQL, MySQL, MongoDB, Supabase

Tools & Platforms: Git, GitHub, Jupyter Notebook, Node.js (Express), React, n8n

EDUCATION

BSc (Hons) in Information Technology - Data Science Specialisation

Sri Lanka Institute of Information Technology (SLIIT) | 2023 - 2027 (Expected)

CGPA: 3.56 / 4.00

Relevant coursework: Machine Learning, Data Mining, Big Data Analytics, Database Systems, Cloud-Driven Solutions

WORK EXPERIENCE

Purchasing Manager

Sillara Agri Tech | 2024 - Present

- Designed and automated the daily procurement pricing workflow, replacing a manual multi-step process with a repeatable pipeline
- Ran exploratory data analysis on supplier and purchasing datasets to surface pricing trends and build margin logic across fresh produce and packaged goods categories
- Cleaned, validated and consolidated data from multiple sources into a single reliable reporting dataset used for daily pricing decisions

PROJECTS

Flood Risk Prediction & Decision Dashboard - Undergraduate Research

2026 | Python, scikit-learn, pandas, NumPy, time-series forecasting, Matplotlib

- Built a machine learning model that forecasts Kelani River Basin flood events seven days ahead from upstream rainfall and river-discharge data
- Validated predictions against 15 years of recorded historical flood events (2010-2025)
- Own the decision dashboard over the model output, turning forecasts into information a responder can act on; paper targeted at ICTer 2026

Asteroid Orbit Viewer - Machine Learning & Data Visualisation

2025 | *Python, scikit-learn, pandas, NumPy, classification, JavaScript*

- Trained scikit-learn classification models on orbital element datasets to predict Earth-impact risk for near-Earth objects
- Built an interactive visualisation layer over the model outputs so predictions can be explored rather than only read

PodBang - Agentic AI Podcast Automation

2025 | *LLM APIs, n8n, prompt engineering, React, Node.js*

- Built an agentic platform where autonomous agents plan, generate, refine and publish podcast episode content end to end with minimal human intervention
- Source: <https://github.com/Eyaas-Ajmal/pod-AI>

AI Code Reviewer - GenAI Developer Tool

2025 | *LLM APIs, prompt engineering, Python, React*

- LLM-based review assistant that analyses code quality, suggests refactors and translates between programming languages

WashCO - Multi-Vendor Booking Platform

2026 | *React, Node.js, Express, PostgreSQL, Supabase*

- Slot-based scheduling system for car wash vendors and customers, with vendor management and role-based access control, replacing a manual process prone to double-bookings

CERTIFICATIONS & COURSES

- Machine Learning Specialization - DeepLearning.AI and Stanford Online (Coursera), 2024
- Machine Learning with Python - Simplilearn, 2025
- Data Science Bootcamp - freeCodeCamp, 2023
- Python for Data Analysis - freeCodeCamp, 2023

ACTIVITIES

- Member, Rotaract Club of SLIIT (2024 - 2026)
- Rugby at Zahira College and university level
